

Shanghai Qiuyi Valve Co., Ltd.

The company main product includes: the [globe valve](#), [butterfly valve](#), [gate valve](#), and [plug valve](#), [check valve](#), [dbb valve](#), one of the most important: valve, check valve, valve, valve, and the three years of operating companies from me in sales.

Which [butterfly valve](#) and [check valve](#) is using the most valves, butterfly valves are used as a kind of the surface, say nothing in the valve is very special requirements of the situation, because in the basic [butterfly valve](#) and check valve is relatively large, the valve can be seen, the world is in constant progress, of course, a large valve is used in large factory of big projects.

Secondly like cock these small points of the valve is relatively less, but using the globe valves, gate valves is important. For valves used surface is also a wider, because of its valve surface into spherical, good-looking and use.

So far, the [check valve](#), [ball valve](#), [gate valve](#), [globe valve](#), [butterfly valve](#) are better ranking rose, the [plug valve](#) cock belongs to zero.

The first step here, if you want to know more, please pay attention
